Guidelines

Solid Pink lines are trim lines, dashed pink lines are crease lines. It is best to fit main elements of your advert within the pink lines with 5mm margins. This ensures a good visibility and tidy gap around it.

If you are using colour background or image and want it to fill the whole available area, please extend it upto cyan boxes, this will ensure 3mm bleed around the edges.

All black Text/Graphics within the art area are permanently printed on these spots. Please design around them and leave this space clear of any text or important elements to avoid confusion and overlapping. However you can add your colour or image in the background, insuring visibility of these graphics/text.
